# VISION

We're here to stay and build no matter the outcome until our vision is delivered as we believe each one of us has our role to play in the mainstream adoption of Web3 in our everyday life and it all begins with an idea.

2.08673

This goes beyond just creating some hype collection or metaverse game to capture people's attention. It goes to building a safe space where people are welcomed no matter their backgrounds.

4.385

We set out to build a world and brand within the Web3 world that extends to every corner of the crypto space but also build the bridge to Web2.

1.839746

Over the coming months we want to be the first place people looking to join when they think NFTs, Metaverse, and Web3.

3.2738

Begin WorkBuilding the people to business bridge within the retail world within the web3 space. Our vision is to build a bridge bringing Web3 to those still focused with Web2.

# 10000LEAVES

*What is 10000LEAVES? This is the Prelude to our Web3 expansion of Eden. Our Phase 1 plans have yet to begun but we wanted to create a unique, relatable collection for anyone to join us on our adventure from the start. So we created 10000LEAVES, a collection of literally 10000 leaves that were created by our artist and then altered through advanced AI Art Engines to create beautiful seasonal backgrounds depicting leaves in different environments. And although these LEAVES are just the beginning, these leaves will act as Founder's Passes for everything within the world of Eden.*

# INTRODUCTION

Owning one of our leaves will grant exclusive access to our community through all future developments as we want to recognize and reward those of you that joined us from the beginning of our vision. Besides owning unique hand created and AI altered art, the leaves NFT will be founder passes to our project within the EdenVerse, our game and The Garden. Each leaf will give its holder access to the holder's Tree Fund, WL access to the upcoming character drop, a leaf plot to store an item within the game per leaf, WL to The Puzzle Event, and The Garden. It is meant to be an exclusive access to everything we build which is also why we want a low barrier to join our community this early with an initial mint of around \$5 at 0.005 eth for the first half of the collection to thank our earliest supporters. With each step of the roadmap, we plan to include and implement LEAVES into every single phase to make sure that LEAVES remember they are the foundation of what we build within the evolving Web3 space.

# TREE FUND FOUNDER'S FUND

With any project, our long term success will be in the hands of our community. Our team is dedicated to becoming a bridge between Web2 and Web3 but it is our community and seeing your support and reactions to our work that keeps us motivated.

Therefore, we are creating both the Tree Fund and the Founder's Fund solely dedicated to be a way to always recognize the community for everything they do.

Our goal is to allocate Eth from the initial mint of LEAVES directly to the Tree Fund and an additional separate Eth pool for the Founder's fund.

These two funds will be a reminder that the community defines a project's success. To emphasize this, every single development into the future of EDEN will always allocate a portion of any source of raise or revenue towards these two funds; as we grow so will our community.

These two funds will be directed by our leaf holders and by the GateKeepers through regular voting consensus. Leaf holders will have 1 vote per leaf in a wallet while GateKeepers will hold 5 votes per leaf they hold within their wallets for all Tree Fund voting proposals. For the direction of the Founder's fund, each GateKeeper will hold 1 vote per leaf they hold within their wallet.

# LEAF CHALLENGE

*Something for our community to enjoy on the reveal of our leaves. We've decided to hide around 50 identical leaves throughout the entire collection. These leaves will be hidden throughout the collection and be randomly distributed to minters when they mint a leaf. If a leaf holder collects matching NFTs, they will receive a reward per every match that can be claimed for the first time that match is discovered by a single wallet.*

*i.e. NFT #5835 and #9583 are a match, the first time these matches are held within a wallet and claimed will be granted the matching leaf challenge reward for those two matches. If a third match is discovered i.e. #2897 then a holder of either #5835 and #9583 could obtain #2897 to claim the match reward but only for the first holder to obtain, own, and claim the match reward for that match.*
